

<u>Product Specification</u> Ningbo Youte Metal Products Co., Ltd.	P/N: 500130	A
	200 stainless steel band, Size 0.50mm * 20.00mm * 50m	

physical properties

width: 20.00mm $\pm 0.10\text{mm}$

Thickness : 0.50mm $\pm 0.02\text{mm}$

Surface : BA Bright Camber: not to exceed 1/2 in over 8 ft span.

Edge : #5 Deburred

Mechanical Properties

Tensile : 650mpa min

Yield : 350mpa min

Elongation : 40% min

Hardness : HV180-220

Chemical Properties

C:0.015 S:0.030 MAX

Cr:13.0-15.0 P:0.065MAX

Ni:1.0-3.0 Si:0.75max

Mn:8.0-12.0 Cu:1.0-2.0

N:0.075-0.25

product description

The use of Baosteel's refined stainless steel 200 material has good corrosion resistance.

It is characterized by high strength, good ductility, and can be manufactured in various lengths; smooth edge treatment, that is safe and easy to install. The product has a marking mark on the tie that eliminates unnecessary product waste and allows the user to quickly and accurately measure the exact tie length required for any package.

Stainless steel belts are packed in cartons or plastic boxes. The order quantity exceeds 500 boxes for pallet transport. Air, land and sea shipping options.

Our company produces strictly in accordance with ISO 9001:2015 quality system. So all materials have coded traceability before any one production process.
